Faisalabad, Pakistan

Skills

- SQL (SQL Server, MySQL, PostgreSQL)
- Python (Pandas, NumPy, SciPy, Matplotlib)
- Tableau
- Excel (VLookup, Conditional Formatting, Pivot Tables)
- Microsoft Azure (DataBricks, Azure Data Lake, Azure Data Warehouse)
- Git, Github
- Microsoft Power BI

Projects

CRYPTOCURRENCY MARKET DATA PIPELINE | PYTHON – Personal Project April 2026

- Built an automated pipeline pulling live price data for the top 10 cryptocurrencies from the CoinMarketCap API
- Transformed nested JSON responses into structured tabular data using Pandas for time-series analysis
- Analyzed % price change across 6 timeframes (1h–90d) and visualized trends using Seaborn

GLOBAL TECH LAYOFFS ANALYSIS | SQL · MYSQL – Personal Project May 2026

- Cleaned a real-world dataset end-to-end — removing duplicates, standardizing values, and fixing data types
- Provided technical insights on how the client can fully utilize their data by introducing different technologies
- Ranked top companies per year using CTEs and DENSE_RANK(), with a rolling total to track cumulative impact

DATA PROFESSIONAL SURVEY BREAKDOWN – Personal Project June 2026

- Built an interactive dashboard analyzing survey responses across salary, satisfaction, and tool preferences
- Created gauge visuals showing salary satisfaction at 4.27/10 and work-life balance at 5.74/10 across data roles
- Visualized language preferences with Python dominating all job titles ahead of R, JavaScript, and Java

CUSTOMER PURCHASE BEHAVIOR ANALYSIS | EXCEL · PIVOT TABLES – Personal Project june 2026

- Built an interactive Excel dashboard to uncover what drives customer purchases segmented by income, region, education, and commute behavior
- Discovered that higher-income customers were significantly more likely to buy, with the gap consistent across both male and female segments
- Found commute distance to be a strong behavioral signal — short-distance commuters converted at the highest rate, dropping off steadily beyond 1 mile

Work Experience

INTERN — CLOUD APPLICATION DEVELOPMENT & MAINTENANCE May 2024 - June 2024 Systems Limited

- Worked within a cloud application development team, contributing to backend development and database management using SQL and MongoDB
- Built and consumed REST APIs using Python and Node.js to handle data flow between frontend and backend systems
- Gained hands-on experience with the MERN stack in a professional team environment, working on real client-facing applications

Education

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY—University of Agriculture June 2024 Majors: Database Management Systems, Statistics / Probability, Artificial Intelligence / Machine Learning, Programming Fundamentals
